Monthly Indicators

July 2022

Percent changes calculated using year-over-year comparisons.

New Listings were down 21.9 percent for single family homes but increased 9.1 percent for townhouse-condo properties. Pending Sales decreased 26.3 percent for single family homes and 55.8 percent for townhouse-condo properties.

The Median Sales Price was down 7.2 percent to \$777,000 for single family homes but increased 36.1 percent to \$750,000 for townhouse-condo properties. Days on Market decreased 2.6 percent for single family homes and 12.1 percent for condo properties.

At a time of year when homebuying activity is typically very strong, soaring homeownership costs have caused home sales to decline nationwide for the fifth consecutive month, with existing-home sales falling 5.4% month-to-month and 14.2% year-over-year as of last measure, according to NAR. But there is a bright spot. Inventory of existing homes has continued to climb this summer, with 1.26 million homes available at the beginning of July, equivalent to a 3 months' supply. And despite the summer slowdown, homes are still selling quickly, with the typical home staying on market an average of 14 days.

Activity Snapshot

- 47.2% + 12.1% - 8.8%

| One-Year Change in Sold Listings | One-Year Change in Median Sales Price | One-Year Change in Active Listings |
|---|--|---------------------------------------|
| All Properties | All Properties | All Properties |

Residential real estate activity in the counties of Delta, Eagle, Garfield, Gunnison, Mesa, Moffat and Pitkin composed of single-family properties, townhomes and condominiums. Percent changes are calculated using rounded figures.

Glossary of Terms

A research tool provided by the Colorado Association of REALTORS®

| New Listings | A measure of how much new supply is coming onto the market from sellers. |
|--------------------------------|---|
| Pending Sales | A count of all the listings that went into pending status during the reported period. Pending listings are counted at the end of the reported period. Each listing can only be counted one time. If a listing goes into Pending, out of Pending, then back into Pending all in one reported period, this listing would only be counted once. This is the most real-time measure possible for home buyer activity, as it measures signed contracts on sales rather than the actual closed sale. As such, it is called a "leading indicator" of buyer demand. |
| Sold Listings | A measure of home sales that were closed to completion during the report period. |
| Median Sales Price | A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point. |
| Average Sales Price | A sum of all home sales prices divided by total number of sales. |
| Percent of List Price Received | A mathematical calculation of the percent difference from last list price and sold price for those listings sold in the reported period. |
| Days on Market Until Sale | A measure of how long it takes homes to sell, on average. |
| Housing Affordability Index | A measure of how affordable a region's housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and median income by county. |
| Inventory of Active Listings | A measure of the number of homes available for sale at a given time. The availability of homes for sale has a big effect on supply-demand dynamics and home prices. |
| Months Supply of Inventory | A measure of how balanced the market is between buyers and sellers. It is expressed as the number of months it would hypothetically take to sell through all the available homes for sale, given current levels of home sales. A balanced market ranges from 4 to 7 months of supply. A buyer's market has a higher number, reflecting fewer buyers relative to homes for sale. A seller's market has a lower number, reflecting more buyers relative to homes relative to homes for sale. |
